Reliable solutions

ZW65/75/95

COMPACT WHEEL LOADER

Model code: ZW65-6C / ZW75-6C / ZW95-6C

Engine rated power : ZW65-6:50 kW / ZW75-6:50 kW / ZW95-6:55.4 kW Operating weight : ZW65-6:4710 kg / ZW75-6:5050 kg / ZW95-6:5410 kg

Bucket ISO heaped: $ZW65-6: 0.70 - 1.20 \text{ m}^3 / ZW75-6: 0.80 - 1.50 \text{ m}^3 / ZW95-6: 1.00 - 1.60 \text{ m}^3$

ZW65-6, ZW75-6 AND ZW95-6. NO COMPROMISE

The new Hitachi compact wheel loaders have been developed specifically to meet the demands of the evolving European construction industry. The ZW65-6, ZW75-6 and ZW95-6 offer exceptional levels of performance without compromising on efficiency, thanks to low levels of fuel consumption.

Ideal for a wide range of applications, the ZW65-6, ZW75-6 and ZW95-6 are extremely versatile, offer a comfortable working environment and set a new standard for reliability.

6. RENOWNED FOR RELIABILITY

8. DESIGNED FOR DURABILITY

10. OUTSTANDING VERSATILITY

DEMAND PERFECTION

The range of Hitachi compact wheel loaders has been designed and built using market-leading technology with an emphasis on the environment and operator safety. Developed to perfection, the design of the ZW65-6, ZW75-6 and ZW95-6 has been continuously updated to deliver exceptional productivity at the lowest possible cost of ownership.

Highly productiveHigh dumping speed and optimal pull-out force.

Environmentally friendly

Oil service valve is fitted as standard to prevent oil spillages.

First-rate efficiency and safety

Electro-hydraulic quick coupler.

Convenient access

Easy-to-open engine cover.

Less maintenance

New Deutz Stage V-compliant engine.

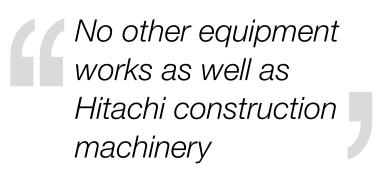

Greater stability

Self-stabilising articulated pendulum joint.

André Molenaar, owner, Molenaar Zand en Grond BV

RENOWNED FOR RELIABILITY

Hitachi construction machinery is renowned worldwide for its reliability to achieve optimum levels of availability and performance, and the new range of compact wheel loaders is no exception. They are able to operate at the highest levels of efficiency, and are easy to maintain thanks to their accessible components.

Minimal downtime

A 500-hour service interval means that Hitachi compact wheel loaders can work reliably for a lengthy period of time between oil and filter changes. This results in minimal downtime and a high level of availability.

Quick access

The engine cover is easy to open for convenient access to the engine compartment, the diesel tank and fuel filter. This helps to ensure routine maintenance is completed quickly to ensure a reliable performance.

Efficient cooling

A bigger air inlet enables more effective cooling and improves fuel efficiency.

Easy maintenance

The battery disconnect switch is now included as standard. This helps to avoid electrical accidents during maintenance and retain battery energy during long-term storage.

Optimum levels of availability

A service valve for draining engine and hydraulic oil is fitted as standard. This saves time during routine maintenance and helps to maximise uptime. It also prevents oil spillages, which is better for the environment.

Easy-to-open engine cover provides quick access.

DESIGNED FOR DURABILITY

Hitachi's market-leading reputation for the toughest construction machinery continues with the new range of compact wheel loaders. Designed and engineered to operate across a wide range of demanding job sites, the ZW65-6, ZW75-6 and ZW95-6 are the epitome of durability.

Electro-hydraulically operated quick coupler for attachments to be connected easily.

Powerful performance

The overall design of the new compact wheel loaders is highly durable. It incorporates a high-performance single arm with a low-torsion, rigid profile. Less torsion on the boom results in greater precision during levelling.

Excellent stability

The Hitachi compact wheel loaders have a self-stabilising articulated pendulum joint. This increases stability, and results in higher levels of durability and control.

Increased protection

The single arm's hosing and wiring are located internally, which provides protection for vital components. This not only enhances the machine's lifespan, but also increases safety and productivity on the job site.

Reduced costs

Additional durability is ensured by the separation of connection and turning points on the quick coupler. This also results in reduced maintenance costs.

The wheel loader is easy to manoeuvre, with precise and smooth movements

Nazif Orakçi, operator, Dolphin Metal Separation

OUTSTANDING VERSATILITY

Hitachi compact wheel loaders provide a smooth and efficient operation on a wide range of job sites. Their versatility is underlined by a compact design, ease of use and high level of precision.

Efficient flexibility

The electro-hydraulically operated quick coupler enables the fast and easy connection of attachments. This also helps to improve safety, as less manual input is required, and enhances overall efficiency. The high flow option is recommended for the use of attachments that require greater hydraulic flow, such as sweepers and mowers.

Easy to transport

Hitachi compact wheel loaders are easy to move between locations on a trailer, with a maximum transportation height of four metres. The ZW65-6 and ZW75-6 models have optional 30km/h travel speeds. This adheres to local legal requirements, further enhancing their versatility.

Improved visibility

Operators have better visibility of the fork attachment, which enables greater precision and a higher degree of versatility. It also has a positive effect on safety.

High productivity

Thanks to a significant loading height, Hitachi compact wheel loaders offer high levels of productivity for a wide range of industry solutions, including general construction work, recycling and agriculture.

Greater control

An optional HDrive enables the manual adjustment of the engine's rpm setting by a switch. This can be used in combination with a sweeper attachment or compactor plate, for example. It improves precision and accuracy, further enhancing the machine's versatility.

Greater variety

With more tyre options than ever before, Hitachi compact wheel loaders are suitable for all types of working environments.

Attachments are fitted safely and easily using the quick coupler.

THE HIGHEST QUALITY

Each new compact wheel loader is rigorously tested to ensure it meets the highest possible standards of performance, reliability and safety. The range is built using high-quality and durable components, and offers operators a user-friendly and comfortable experience.

User-friendly controls enhance operator comfort (multifunctional lever is optional).

Easy access

The door opens 180° and has an additional handle to provide easy and safe access for operators when entering the cab.

Excellent visibility

The 360° panoramic view from the spacious cab helps to create a comfortable working environment, and also helps to increase safety and productivity.

Longer lifespan

The two-sided bearing on the monoboom is of the highest quality. This helps to improve performance and has a positive effect on the overall longevity of the components.

Improved comfort

The controls are ergonomically designed for improved productivity and operator comfort. An optional advanced sound system, comfortable seat and large storage space contribute to the ideal workspace.

User-friendly operation

The easy-to-use joystick is equipped with a speed selector for fast and slow options, quick coupler control and push buttons for 100% differential lock in both axles. The optional electro-hydraulic controlled joystick features an integrated hydraulic function for easy operation.

Anti-theft

The optional immobiliser key offers enhanced protection against theft.

State-of-the-art technology is at the heart of our compact wheel loaders

Martin Vissers, Compact Wheel Loader Specialist, Hitachi Construction Machinery (Europe) NV

SUPERIOR TECHNOLOGY

The advanced technology incorporated within the design of the ZW65-6, ZW75-6 and ZW95-6 has been developed to meet the ever-changing needs of the construction industry. Every component has been built to maximise performance and offer a superior operating experience.

Latest regulatory compliance

The new Deutz Stage V-compliant engine contains a cooled exhaust gas recirculation (EGR) system, common rail technology and diesel oxidation catalyst (DOC). This leading technology helps to reduce maintenance requirements and minimises regeneration cycles.

Saving costs

The new state-of-the-art drivetrain offers maximum propulsion force and improved levels of serviceability. This feature also helps to minimise downtime and reduce running costs.

Optimum performance

Hitachi compact wheel loaders are fitted with a multifunctional display that shows useful information and status updates at a glance. This helps to make maintenance easier and ensures an optimum performance.

Increased productivity

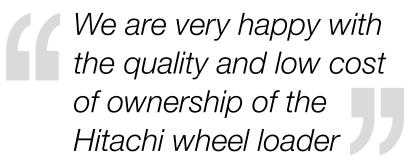

Powerful Z-kinematics ensure a higher dumping speed and optimal pull-out force. This example of advanced technology improves performance and increases productivity.

Maintenance requirements are reduced by the new engine.

Phil Meuser-Schaede, owner, Trasswerke Meurin

REDUCING THE TOTAL COST OF OWNERSHIP

Hitachi has created the Support Chain after-sales programme to ensure optimum efficiency, as well as minimal downtime, reduced running costs and high resale values.

Global e-Service

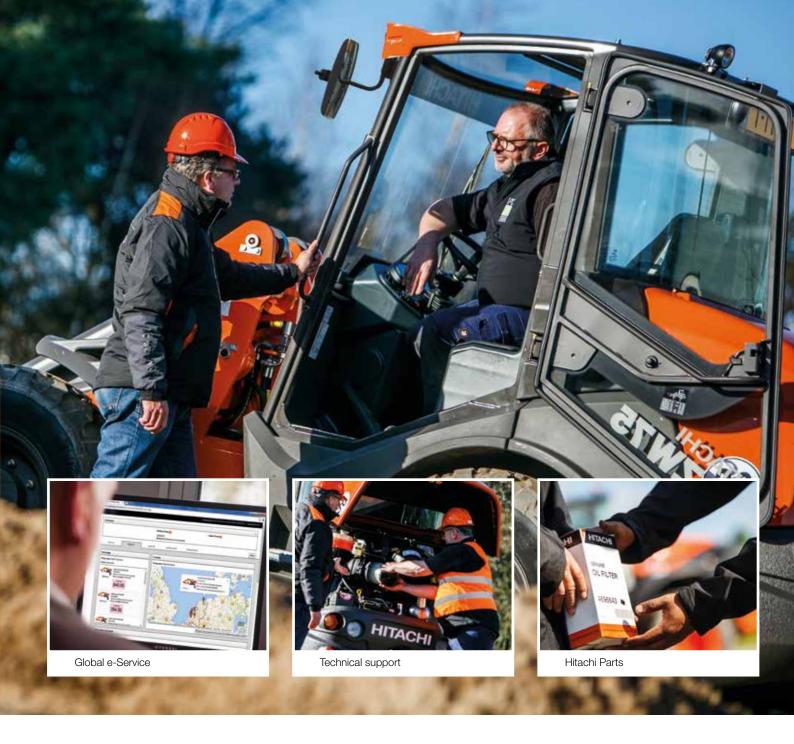

Hitachi has developed two remote monitoring systems as part of its Global e-Service online application. Owner's Site and ConSite are an integral part of the wheel loader, which sends operational data daily via GPRS or satellite to www.globaleservice.com. This allows immediate access to the Owner's Site, and the vital information that is required for support on job sites.

Technical support

Each Hitachi service technician receives full technical training from HCME in Amsterdam. These sessions provide access to the same technical knowledge available within the Hitachi quality assurance departments and design centres. Technicians combine this global expertise with the local language and culture of the customer to provide the highest level of after-sales support.

Extended warranty and service contracts

Every new Hitachi compact wheel loader is covered by a full manufacturer's warranty. For extra protection – due to severe working conditions or to minimise equipment repair costs – Hitachi dealers offer a unique extended warranty called HELP (Hitachi Extended Life Program) and comprehensive service contracts. These can help to optimise the performance of each machine, reduce downtime and ensure higher resale values.

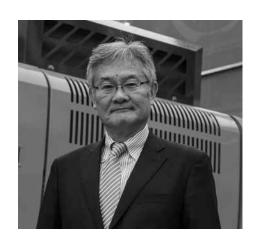

Parts

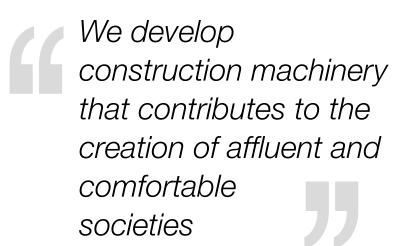

Hitachi offers a wide range and a high availability of parts dispatched from the $53\ 000\ m^2$ HCME European Parts Depot in The Netherlands.

- Hitachi Genuine Parts: allow machines to work for longer, with lower running and maintenance costs.
- Hitachi Select Parts and 2Genuine Parts: especially for older machines, they cost less, are of proven quality and come with the manufacturer's warranty.
- Performance Parts: to cope with highly demanding conditions, they have been engineered for greater durability, better performance or longer life.
- Remanufactured components: offering an economically viable solution, they are the best option when preventative replacements are required.

Whatever the choice, the renowned quality of Hitachi construction machinery is assured.

Kotaro Hirano, HCM President

BUILDING A BETTER FUTURE

Established in 1910, Hitachi, Ltd. was built upon a founding philosophy of making a positive contribution to society through technology. This is still the inspiration behind the Hitachi group's reliable solutions that answer today's challenges and help to create a better world.

Hitachi, Ltd. is now one of the world's largest corporations, with a vast range of innovative products and services. These have been created to challenge convention, improve social infrastructure and contribute to a sustainable society.

Dump trucks

Hitachi Construction Machinery Co., Ltd. (HCM) was founded in 1970 as a subsidiary of Hitachi, Ltd. and has become one of the world's largest construction equipment suppliers. A pioneer in producing hydraulic excavators, HCM also manufactures wheel loaders, rigid dump trucks, crawler cranes and special application machines at state-of-the-art facilities across the globe.

Incorporating advanced technology, Hitachi construction machinery has a reputation for the highest quality standards. Suitable for a wide range of industries, it is always hard at

work around the world – helping to create infrastructure for a safe and comfortable way of living, developing natural resources and supporting disaster relief efforts.

Hitachi wheel loaders are renowned for being reliable, durable and versatile – capable of delivering the highest levels of productivity under the most challenging of conditions. They are designed to provide owners with a reduced total cost of ownership, and operators with the ultimate level of comfort and safety.

Prior to operating this machine, including satellite communication system, in a country other than a country of its intended use, it may be necessary to make modifications to it so that it complies with the local regulatory standards (including safety standards) and legal requirements of that particular country. Please do not export or operate this machine outside the country of its intended use until such compliance has been confirmed. Please contact your Hitachi dealer in case of questions about compliance.

These specifications are subject to change without notice.

Illustrations and photos show the standard models, and may or may not include optional equipment, accessories, and all standard equipment with some differences in color and features. Before use, read and understand the Operator's Manual for proper operation.
